## Re: Concrete deliveries to Mynydd y Gwair Wind Farm

Dear Resident,

We write to inform you of a temporary change to working hours at the Mynydd y Gwair Wind Farm site.

We are now at the stage where we have started construction of the sixteen wind turbine foundations. Each foundation will require approximately 300m<sup>3</sup> of concrete and must be completed within one day.

The concrete pours will be undertaken on Tuesdays and Thursdays each week. They are scheduled to start on Tuesday 26th June and will continue thereafter for approximately 8 weeks.

We have been permitted to commence concrete deliveries from 6am and work until 8pm to facilitate the foundation pours. On all other days the working hours will remain as normal however this schedule could be subject to change due to weather, concrete availability or on site progress.

If you have any questions, please contact us on 0800 0727604 or [mynyddy-gwair@innogy.com](mailto:mynyddy-gwair@innogy.com).

Thank you for your continued patience during these construction works.

Mynydd y Gwair Wind Farm Construction Team
